

TE Enhanced Series

Extruded Channels for Tape Light

The Kichler Enhanced Series of Aluminum Extruded Tape Channels is a step up from a simple lighting effect. The 30-degree angled channel doubles as a 60-degree channel when rotated for expanded installation options. The surface and recessed channels in this series are broad - allowing for multiple strips of LED tape light. The added illumination takes your tape light installation from accent to ambient - ideal for task-driven applications.

Surface Mount

These channels install onto a surface to create sturdy under-cabinet, shelving or even step lighting. Miter cut and connect for custom shapes.

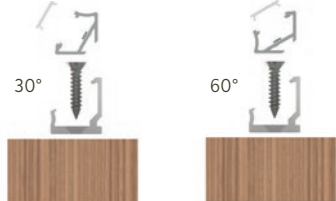

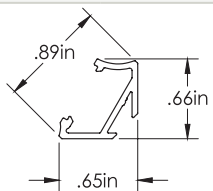

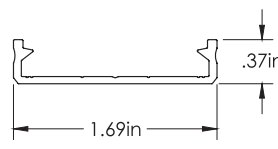

Recessed Mount

By creating space within drywall, shelving or other surfaces, recessed channels can then be inset for a seamless, built-in lighting effect. Miter cut and connect for custom shapes.

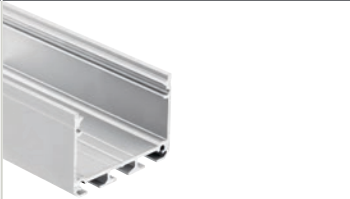

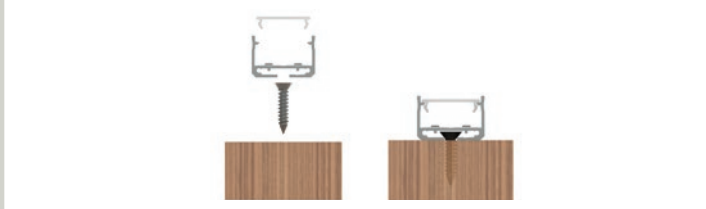

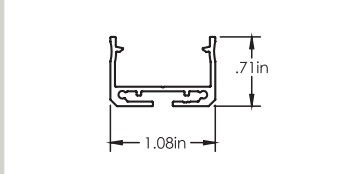

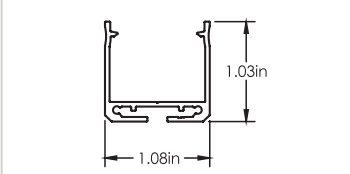

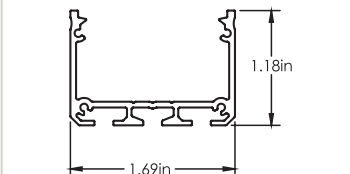

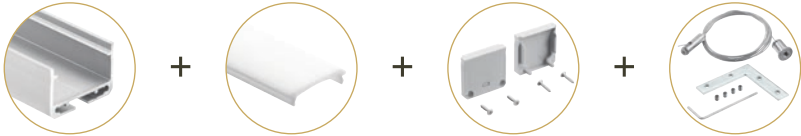

With the Kichler Enhanced Series, you choose your components to create your desired channel assembly - similar to those shown above.

Choosing a Channel Depth

- **Shallow Channel** - sleek, cost effective, presents a light distribution that's true to its source
- **Standard Channel** - common depth offers a light distribution that is gently diffused
- **Deep Channel** - allows the light to blend within the channel, resulting in a greater diffused light

Choosing a Lens

- **Clear Lens** - allows the most light through, noting that diodes will be more visible
- **White Opaque Lens** - diffuses the diodes more, as well as disperses the light output
- **Narrow and Medium Lenses** - utilized to create a thinner, more direct beam for a desired end effect.

<p>Utilize brackets to extend the length of your channel design, or to connect mitered edges to create corners.</p>				<p>For recessed installations.</p>	<p>To suspend channels as a fixture.</p>

TAPE SOLD SEPARATELY.

Kichler offers 6T Series 24V Tape as well as 4T Series 12V Tape.
For a complete tape-to-channel compatibility matrix, refer to the
TE Series Product Installation Guidelines on Kichler.com.

Advanced Product Solutions (APS) & Layout

Free layout and design services—and so much more.

From answering questions to creating detailed layouts to delivering a full bill of materials (BOM) – the Kichler APS & Layout team is your link to getting the job done. This free service takes the guesswork out of any lighting need you have: determining the scope of materials required, recommending dimmers and even creating a full wiring and product layout.

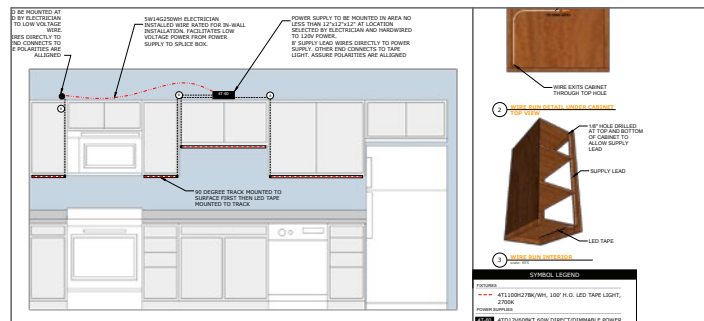

Layout Design Services

Get to solutions faster and increase sales.

From choosing landscape lighting to maximizing a kitchen's functionality; from outfitting a restaurant with lighting to coordinating lighting throughout a home—these are just a few of the jobs our APS & Layout team can get done for you.

Contact us at layouts@kichler.com and we'll get you started:

- 1 Email us a completed Design Request Form (available at Kichler.com/APS) along with any drawings or pictures related to the job.
- 2 We'll create a BOM and email it back to you that same day (for all requests received by 3 pm EST).
- 3 Once you confirm the BOM and pricing, we'll return a completed layout design within 48 hours or less.

Advanced Product Support

No question is too complex.

Installation issue? Building code question? Regulatory stumper? If you've got a challenging question—we've got you covered. Our Advanced Product Support team received additional classroom and in-field training on all Kichler products, so you can get your question answered quickly. To take advantage of this free service, call our dedicated Advanced Product Support line at **844-KICHLER (844-542-4537)** or email techsupport@kichler.com.
